- Worked with Tata Consultancy Service Ltd Mumbai, as **Consultant** for SAP ABAP & HANA Developer (Nov 2022 – Aug 2024).
- Worked with Capgemini Technology Pvt Ltd Mumbai, as **Associate Consultant** for SAP ABAP specializing in Advance Planning Optimizer for (SCM) Module (March 2019 – Oct 2022).
- Worked with Hinduja Global Solution Ltd. Bangalore as an **IT Support Engineer** for 1 year (Oct 2017- Oct 2018).
- **Overall work experience: 8 years**
- **7 years** of experience as a **Certified Technical Software Developer in SAP ABAP SAP HANA & RAP ABAP**
- Basic Functional Understanding of **FI, APO** module
- Completed 3-month **Foundation Training** of Capgemini at LND Centre, Bangalore with specialization in **SAP ABAP and ABAP on HANA** from (Mar-May) 2019.
- Received client appreciation for work excellence.
- Proactive in learning and having good communication skills.

RELEVANT WORK EXPERIENCE

CLIENT: Apple INC (Oct 2024 – Till the Date)

Environment: SAP HANA, SAP ABAP, OOABAP

Nature: Brownfield Implementation

Roles and Responsibilities:

- Working as **Senior Technical Consultant** focusing on Developing, executing and debugging technical issues, including test cases and test scripts for custom report and dashboard development using SAP ABAP.
- Lead development and debugging of **20+ custom reports and dashboards**, reducing manual reporting effort by ~25%.
- Developed objects on ABAP on HANA including **CDS Views, AMDP, HANA Modelling, Enhancements, Function Modules, Reports, RFCs, OO ABAP and Forms**, improving system performance by ~15% on key transactions.
- Designed and configured multiple **CDS Views**, enabling faster data retrieval and reporting for business users.
- Implemented **AMDP & HANA modelling solutions** for critical business processes, reducing runtime of key processes.
- Troubleshoot production issues, applied customizations, and prepared **detailed error analysis documents** that reduced recurring issues by 30%.

- Coordinated daily with onshore teams, highlighting risks and blockers, maintaining agile delivery in **Scrum-based environment**.
- Collaborated with end-users to streamline business processes and delivered **5+ process improvement solutions** with comprehensive documentation.
- Utilized **ServiceNow and Radar** for Incident, Change, and Problem Management, maintaining 100% SLA compliance.

CLIENT: DEUTSCHE BORSE (Nov 2022 – Aug 2024)

Environment: SAP HANA, SAP ABAP, OOABAP, VIM – GCP Environment

Roles and Responsibilities:

- Working as **ABAP Technical Consultant** focusing on Developing, executing and debugging technical issues, including test cases and test scripts for custom report and dashboard development using SAP ABAP.
- Developed and debugged SAP ABAP solutions including **CDS Views, AMDP, HANA Modelling, Enhancements, Function Modules, Reports, RFCs, Smart Forms, Adobe Forms, and OO ABAP objects**, delivering **10+ high-impact reports and modules**.
- Provided **production support**, reducing average issue resolution time by ~20%.
- Conducted error tracking, analysis, and testing in ABAP cockpit; prepared **technical documentation** improving team knowledge sharing.
- Participated in **daily scrum meetings**, reporting status, risks, and blockers, contributing to on-time delivery of 95% of sprint tasks.
- Collaborated with end-users to gather requirements and implement **process optimizations** that improved reporting accuracy by ~15%.
- Worked in an **Agile environment**, managing incidents, changes, and problems using **JIRA**, ensuring seamless business operations.

CLIENT: BAYER (May 2019 – Oct 2022)

Environment: SAP ABAP and SAP SCM (APO)

Roles and Responsibilities:

- Joined as **Junior Developer** contributing to **Greenfield implementation** of SAP SCM (APO) modules by assisting in the design and development of ABAP solutions under senior guidance.
- Developed, tested, and debugged **ABAP reports (ALV – Classical & Interactive)**, **OO ABAP programs**, **Function Modules**, **Data Dictionary objects**, and **RFC-enabled services**.
- Assisted in creating **custom enhancements, user-exits, BADI implementations, and forms (Smart Forms & Adobe Forms)** to extend standard SAP functionality.
- Supported **production and development environments**, troubleshooting issues and applying fixes as part of the support team.
- Prepared **technical documentation and error analysis reports**, ensuring knowledge transfer and reproducibility.
- Participated in **daily Agile/Scrum meetings**, providing updates, tracking tasks, and escalating issues to senior developers.
- Collaborated with functional teams to understand business requirements and implement **technical solutions** under guidance.
- Gained hands-on experience in integrating **Greenfield developments with existing SAP landscapes** and ensuring smooth data flow between modules.
- Worked in an **Agile-based environment** with exposure to **Service Management processes** including Incident, Change, and Problem Management using **HPSM and ServiceNow**.

CLIENT: BAYER (July 2020 –Sept 2020)

Environment: SAP ABAP, Unicode Updation.

Roles and Responsibilities:

- Worked as **SAP ABAP Technical** Resource.
- Worked on Unicode migration through required changes and validating code with the expected output being part of the development team.
- Worked in a development environment, which included business requirements implementation of current issues and doing customization as and whenever required.
- Maintaining a high level of coding standards and error-free.
- Closely worked with an onshore team, updating status, and highlighting risks and blockers for aggregators.
- Worked for hyper-care support in a production environment.
- Received Appreciation from the client for a smooth transition with accuracy for the expected response.
